Data Analyst | Software Developer | Transforming Insights into Impact

Professional Summary

Results-driven Data Analyst and Software Developer with a strong foundation in data analytics, software engineering, and customer interaction. Skilled in using SQL, Excel, and Power BI to extract, transform, and visualize data for strategic decision-making. Experienced in building, testing, and deploying web applications using JavaScript, React, and C++. Known for blending technical expertise with strong communication and problem-solving skills to deliver efficient, data-backed solutions. Eager to contribute to innovative teams that value insight, precision, and performance.

Technical Skills

- Data Analytics & Visualization: SQL, Excel, Power BI, Tableau
- Programming & Web Development: JavaScript, React, Ruby, C++
- Software Tools: Microsoft Office 365 (Word, Excel, Outlook, Teams, SharePoint), Visio
- Soft Skills: Problem-Solving, Team Collaboration, Critical Thinking, Adaptability, Communication & Presentation

Work Experience

Data Entry Specialist - NHIF (Mar 2021 - Sep 2021)

- Managed and validated large datasets, maintaining accuracy and confidentiality.
- Supported clients by resolving inquiries related to data records and system access.
- Enhanced data management efficiency through process improvements and quality checks.

Software Testing Intern - Tezza (Feb 2019 - Sep 2019)

- Collaborated with QA teams to design and execute comprehensive test plans.
- Documented and tracked software defects, ensuring timely resolution.
- Conducted functional and regression testing to optimize software performance.

Customer Support & Technical Assistance (Freelance Experience) - Self-Employed (2020 - Present)

- Delivered remote technical support and troubleshooting for clients across multiple digital platforms.
- Improved customer experience by assisting users with application navigation and issue

resolution.

- Managed feedback loops and performance tracking to ensure continuous improvement.

Education

Bachelor of Science, Computer Science - Meru University (Graduated)

Certifications & Training

- Data Analytics Certification (IBM, YouTube, W3Schools - Ongoing)
- Software Engineering Certification - Moringa School

Projects

- Customer Data Insights: Created Excel dashboards to analyze customer satisfaction trends and performance metrics.
- Automated Response System: Developed a chatbot that streamlined customer inquiry handling and improved response time.
- Data Visualization Dashboard: Built a Tableau dashboard to visualize business performance and operational KPIs.
